

Digital File Submission Guidelines

Below is a list of all the acceptable applications that Graphic Controls supports. These applications are specifically designed for the print media/publishing industry. In order to give you the best quality product please send the original created file in the formats below. We currently have all the latest versions of these applications. Please include all supporting files and fonts with the your digital files.

- > **Macromedia Freehand**
- > **Adobe Illustrator**
- > **Adobe PhotoShop**
- > **Corel Draw**
- > **QuarkXpress**
- > **Adobe PageMaker**

Anything deviating from the above will result in recreating your artwork in an acceptable format. This will require extensive time for our artist to recreate your design.

If others have capabilities that we do not, please advise and we will upgrade our capabilities.

Please Note. NOT acceptable Files:

Microsoft Word, Works, Word Perfect, Excel, Publisher, and PowerPoint.

These applications are not designed for any print application and cannot be used in printing workflows.

Web Files are NOT acceptable:

- > All internet/web artwork is low resolution. These images are 72dpi, made to be only viewed on a computer monitor. They are not high enough resolution for print.
- > All photographic images should be scanned in a 300dpi resolution. Bitmap images (black & white) should be scanned at 1200dpi.

We also need to know:

If the file you are sending came from a Mac or PC?

What the PMS (Pantone® Matching System) Colors are?

Is there a special or pattern varnish area?

Is there Sequential Numbering?

Is there a Security Feature?

Are there internal Perforations?

Fonts:

Please include all fonts with your digital files. If possible, using a vector base application i.e. Freehand, Illustrator, Coral Draw convert fonts to paths. This will convert the selected font to a working line drawing.

File Transportation:

All artwork files can be e-mailed to tickets.graphiccontrols@tycoint.com. In addition to e-mail we can support any removable disk media for transporting files to: **Graphic Controls 400 Exchange Street, Buffalo, NY 14240**

Important Notes:

Please supply a hard copy printout of the digital files that you are submitting. In addition to the print outs please supply a previously printed sample of your current ticket that is thermally imaged on.

Proofs:

All customers will receive a one up digital color proof followed by electronic pdf file for your review. Please note that pdf proofs are not accurate for color. If you or your customer require a high end proof such as a matchprint, chroma, iris, etc. please let your sales representative know.
